Disabling the test environment for sending JPK files

The Ministry of Finance informs about the exclusion of the test environment for sending currently valid JPK files

The Ministry of Finance informs that due to the ongoing work on launching the test environment for the new JPK_VAT with the declaration (JPK_V7M and JPK_V7K), the test environment for the currently operating JPK will be switched off on the night of February 20-21. The work is aimed at enabling JPK_V7M and JPK_V7K transmission tests via an API (gateway).

A separate message will inform you about launching the test environment for the new gate.
