## Change of interface for sending JPK data

---

### Change of interface for sending JPK data from micro enterprises that are authorized on the basis of personal data and the value of amounts from previous settlements

The Ministry of Finance informs that due to the planned entry into force of the new JPK\_VAT file with the declaration, the existing MF interface (micro JPK) made available for sending JPK\_VAT information by micro enterprises will be removed:

- [esb2.mf.gov.pl:5064](#) (production environment, planned shutdown on 01/04/2020)
- [esb-te.mf.gov.pl:5064](#) (test environments, planned to shut down on February 21, [2020](#) )

JPK\_VAT files signed with the taxpayer's authorization data can be submitted via the modified existing REST API interface:

- [e-dokumenty.mf.gov.pl](#) (production environment)
- [test-e-dokumenty.mf.gov.pl](#) (test environments)

on the principles described in the modified interface specification.

The test environment will be launched and the specifications will be published by the end of February 2020.
