

MF has provided a search engine with binding bid information

Krzysztof Koślicki

VAT NEWS Date added: 26.02.2020

The tax office can already be asked to confirm the correctness of the applied VAT rates. It's about the so-called WISs, i.e. binding rate information. The new procedure is related to the VAT changes taking place in April. The issue of WIS costs PLN 40. The answers given are already published on the treasury page.

The National Tax Information Service has provided a search engine for binding rate information (WIS) – a new instrument operating under tax law, related to the new VAT rate matrix. This is one of the elements of the ongoing reform of VAT rates, which aims to sort out the unclear criteria that have already occurred in t

Marlena Rynio, a consultant at Crido, points out **classification regarding the Combined Nomenclature**. Similarly to tax interpretations – WIS should form the classification opinions practiced so far) in the application. Importantly, in the case of an identical classification, WIS is, in principle, to have protected
