## Introduction

By the Act Amending the Act on Value Added Tax and Other Acts dated July 4<sup>th</sup>, 2019 (Journal of Laws item 1520), which amended the Act on Value Added Tax dated March 11<sup>th</sup>, 2004 (Journal of Laws of 2018, item 2174, as amended), hereinafter referred to as the “Act”, the legislator simplified the fulfilment of reporting obligations by VAT taxable persons. The JPK\_VAT records information and the VAT-7 return or, alternatively, VAT-7K return, which until the amendment’s entry into force were filed separately, are now incorporated into one electronic tax file.

Under the new laws, the VAT-7 return or, alternatively, VAT-7K return and records information are now replaced by one JPK\_VAT electronic file, that is, JPK\_V7M or JPK\_V7K.

### NOTE

The new JPK\_VAT file is intended only for tax filings made so far on the **VAT-7** or **VAT-7K** forms.

It is not intended for any other tax filings (for instance, filings made on the VAT-12, VAT-8, VAT-9M, VAT-10 or VAT-14 forms). These shall be governed by the laws that have been applicable hitherto.

The constituent elements of the new JPK\_VAT file are presented in the Ordinance of the Minister of Finance, Investments and Development Concerning Specific data to be Contained in Goods and Services Tax Returns and Records dated October 15<sup>th</sup>, 2019 (Journal of Laws item 1988), as amended by the Ordinance of the Minister of Finance dated April 1<sup>st</sup>, 2020 (Journal of Laws item 576) and the Ordinance of the Minister of Finance dated June 25<sup>th</sup>, 2020 (Journal of Laws item 1127), hereinafter referred to as the “Ordinance”, and in the logical structures developed on the basis of this Ordinance for JPK\_VAT, that is, the JPK\_V7M and JPK\_V7K structures.

The new JPK\_VAT file, which incorporates the VAT return part and the VAT records part, is to be filed mandatorily by all registered active VAT taxable persons as of October 1<sup>st</sup> 2020.<sup>1</sup>

---

<sup>1</sup> Originally, the new JPK\_VAT incorporating the record part and the return part was to be filed by the so-called large business entities for tax periods beginning April 1<sup>st</sup>, 2020, and by the other business entities for tax periods beginning July 1<sup>st</sup>, 2020. Pursuant to Art. 58 point 4 of the Act Amending the Act on Specific Solutions Related to Preventing, Counteracting and Combatting COVID-19, Other Contagious Diseases and Crisis Situations Caused by These Diseases, and Certain Other Acts dated March 31<sup>st</sup>, 2020 (Journal of Laws of 2020, item 568), the date as of which this new obligation shall be imposed on large business entities has been extended to July 1<sup>st</sup>, 2020. Thereafter, pursuant to Art. 72 point 2 of the Act on the State Financial Aid Provided to Business Entities Affected by COVID-19 Applying for Bank Loans to Maintain Liquidity and on the Simplified Procedure of Approving the Scheme of Arrangement in Connection with COVID-19

**NOTE**

As of October 1<sup>st</sup>, 2020, all VAT-7 returns or, alternatively, VAT-7K returns and the VAT records may only be filed jointly in the form of the new JPK\_VAT file.

**NOTE**

All amended VAT return or VAT records filings pertaining to any period preceding the entry of the new laws into force shall be made as required under the laws applicable in that earlier period (i.e. amendments to all VAT returns or JPK\_VAT records information filed according to the principles being previously in place shall be made according to those previous principles).

There are two types of the JPK\_VAT file:

- **JPK\_V7M** – for VAT filings made **on a monthly basis**,
- **JPK\_V7K** - for VAT filings made **on a quarterly basis**.

**NOTE**

**JPK\_V7M** – to be used by taxable persons filing their VAT records and VAT returns **on a monthly basis**.

These taxable persons should fill in all the fields in their XML-format JPK\_V7M file, i.e. **Naglowek, Podmiot1, Deklaracja** and **Ewidencja**.

**JPK\_V7K** – to be used by taxable persons filing their VAT records **on a monthly basis** and VAT returns **on a quarterly basis**.

When making their JPK\_V7K filings for the first two months of a quarter, a taxable person fills in the following elements of the XML-format file: **Naglowek, Podmiot1** and **Ewidencja**. When making a JPK\_V7K filing for the third month of the quarter, the taxable person fills in all the elements of the XML-format file, that is, **Naglowek, Podmiot1, Deklaracja** and **Ewidencja**, in such a manner that in the element **Deklaracja** the taxable person enters data pertaining to the entire quarter and in the records part, in the fields **Ewidencja** – VAT records information pertaining to the last month of the quarter.

---

dated June 19<sup>th</sup>, 2020 (Journal of Laws of 2020, item 1086), the date as of which this new obligation shall be imposed on all business entities has been extended to October 1<sup>st</sup>, 2020.

## NOTE

Taxable persons making amended VAT filings should fill in only these fields of their XML-format file that are to be amended (in the return part or the records part, respectively):

- If both the return part and the records part are amended, the taxable person fills in all the elements of the XML-format file, that is, **Naglowek**, **Podmiot1**, **Deklaracja** and **Ewidencja**.
- If only the return part is amended and the amendment does not affect the records part, the taxable person fills in **Naglowek**, **Podmiot1** and **Deklaracja**.
- If only the records part is amended and the amendment does not affect the return part, the taxable person fills in: **Naglowek**, **Podmiot1** and **Ewidencja**.

### Fields (data) formats of the JPK\_VAT file:

General characteristics of the fields' format:

1. The JPK\_VAT is an XML-format file.
2. The fields of the XML file come into three categories:
  - obligatory fields – to be filled in each time a filing is made; if the required data (for instance, NrKontrahenta or NazwaKontrahenta are not available, the word “BRAK” should be entered.
  - contingent fields – to be filled in only in cases where there are certain data that need to be recorded mandatorily; if there are no such data, these fields should be left blank.
  - optional fields – that is, fields that may but do not have to be filled in; if a taxable person chooses not to provide certain information (e.g. contact details such as a telephone number), these fields should be left blank.
3. The character fields are alphanumeric fields. Small and capital letters and digits are allowed. As a rule, the maximum number of signs is 256.
4. Polish diacritics are encoded with the use of UTF-8. Special characters such as “/”, “–”, “+” may be used in character fields.
5. Numeric fields are data fields intended for numbers to be calculated. Values should be provided in the form of continuous sequences of digits; no separating marks (e.g. spaces) are allowed for thousands. The only admissible decimal separator is a dot (“.”).
6. In the records part, amounts should be rounded up to 2 decimal places, if any (e.g. 12345.56).
7. In the return part, amounts should be rounded up to the nearest zloty in such a manner that fractional parts smaller than PLN 50/100 should be ignored and these greater than PLN 50/100 should be rounded up to the nearest zloty pursuant to Art. 63 § 1 of the Act

dated August 29<sup>th</sup>, 1997 – the Tax Code (Journal of Laws of 2019, item 900, as amended).

8. All negative numbers should be preceded by the negative sign (“-”).
9. Dates should be entered as YYYY-MM-DD (e.g. 2020-08-31).
10. Dates and time should be entered in one field only, i.e. the field intended for the date and time when the file is generated. The date and time format is YYYY-MM-DDTHH:MM:SS (e.g.: 2018-02-24T09:30:47Z, T standing for “Time”). For the Universal Time (UTC), the letter “Z” (ZULU) should be added at the end.
11. Tax identification numbers provided in the records part should be sequences of consecutive digits or letters entered without spaces or other separators; the country code should be entered in a separate field intended for it.

## The records part of JPK\_V7M and JPK\_V7K

### General filing guidelines pertaining to the records part of JPK\_V7M and JPK\_V7K.

1. A taxable person wishing to make an amendment to the records part should submit a new and complete XML-format file containing accurate data. Filings containing amended data only are not allowed.
2. A correction to an erroneous entry not affecting the calculation of output or input tax shall, as a rule, be made by way of the entry's being reversed, i.e. the entire erroneous entry shall be made with the opposite sign and the correct entry, including the original document's number (e.g. DowodSprzedazy, NrKontrahenta or NazwaKontrahenta) shall be provided. However, if the taxable person has not sent the file for a settlement period concerned yet, only one, correct entry may be made.
3. Corrections to documents affecting the amount of taxable base or output tax ("in plus" or "in minus") shall be recorded with the correction documents' numbers for the period for which, according to the Act, the corrections are made.
4. Corrections to documents affecting the amount of input tax "in plus" or "in minus" shall be recorded with the correction documents' numbers. However, in the case of corrections affecting the amount of input tax "in minus" in cases where, according to the Act, the original and the correction document can be included in the records for one accounting period, it is permissible to include only values evidenced by the original document less the values from the correction document.
5. The size of letters does not matter.
6. Numbers of sales and purchase evidence documents should be entered in the records part in full and with original spelling. No identification data of any such evidence may be omitted.

---------------------	--

## NOTE

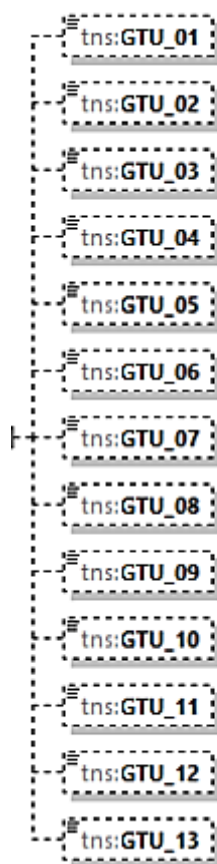

### FP – “Faktura do paragonu” (Receipt-based invoice)

The added Art. 109 sec. 3d of the Act specifies that for the purpose of keeping records, invoices documenting sales recorded in a cash register shall be recognized in the period in which they are drawn up and **shall not increase the sales value and output tax for that period** (since sales are recorded in a cash register and included in a daily and monthly fiscal report in a settlement period in which, as a rule, the tax obligation arises). To avoid amendments to JPK\_VAT files for previous periods, it has been determined that invoices shall be entered into the records part of the JPK\_VAT file covering the month in which they are drawn up, no matter when they are actually recorded in a fiscal report.

### IMPORTANT

The amount of taxable base and output tax charged on the supply of goods and/or services documented by the invoices referred to under Art. 109 sec. 3d of the Act (marked as FP), shall not be taken into account in the check sums of the output tax records.

Diagram 6. The structure of output tax records of JPK\_V7M and JPK\_V7K (from GTU\_01 to GTU\_13).

## NOTE

**Supplies of goods and/or services are marked with the symbols GTU\_01 through GTU\_13.**

**An invoice** shall be recognized **as a whole** by way of “1”s being entered in GTU\_01 through GTU\_13 if a supply of goods and/or services is evidenced by it; no individual values or tax amounts, etc. need to be specified.

A field should be left blank if none of the goods or services is evidenced.

## Example 1

If any of the goods specified under, for instance, 01, 02 or 04 are evidenced by an invoice, the taxable person should enter “1” in “GTU\_01”, “GTU\_02” or GTU\_04”, respectively.

## NOTE

In cases where a sale is documented by an invoice containing **gross sales values of the supply or goods and/or services, where the taxable base is the commission less tax**, apart from the information specified under § 10 sec. 2 point 1 of the Ordinance, in fields intended to be filled in with data on sales according to the respective tax rates, the respective taxable bases should be declared, that is, commissions less tax (including also negative commission values) and output tax charged on the respective commission amounts (for a negative commission value the amount of tax is “0.00”), and the symbols MR\_T or MR\_UZ should be added accordingly.

If the tax amount is calculated on the basis of the total of all commissions generated from individual tourism-related services according to Art. 119 of the Act, supplied in the settlement period concerned, the taxable base for this settlement period is the total of all commissions (positive and negative) less tax charged on this total; however, the amount of output tax for this settlement period is not the total of individual tax amounts. It is charged on the total commission.

If the taxable base so calculated for the settlement period concerned is a negative value, no negative value of output tax may be declared (for a negative commission value, the tax amount is “0.00”).

For a supply of goods where the taxable base is the commission amount less tax, as referred to under Art. 120 sec. 4 of the Act, a taxable person supplying second-hand goods, works of art, collector’s items or antiques they acquired previously within the scope of their business, for resale, the taxable base is the amount of commission being a difference between the sales value and the acquisition value less tax. Pursuant to Art. 120 sec. 5 of the Act, in cases where the type of individual collector’s items or nature of their supply are such that the commission is hard to determine or cannot be determined according to sec. 4, the taxable person may,

subject to the consent of their head of the tax office, calculate the commission as a difference between the total value of supplies and the total value of acquisitions of the given type of collector's items within the settlement period concerned. Pursuant to Art. 120 sec. 7 of the Act, if in the cases referred to under sec. 5 the total value of acquisitions of a certain type of collector's items within the given settlement period exceeds the total value of supplies of these items, the difference shall increase the total value of acquisitions of these collector's items in the subsequent settlement period.

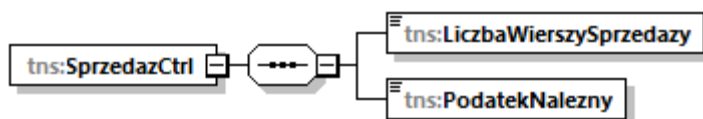

#### NOTE

The cash register sales and sales not documented by invoices and not recorded in the cash register, shall be recorded in aggregate amounts, broken down by individual tax rates and as exempted sales.

## NOTE

For the so-called “zero” return declare “0” in P\_38 and P\_51.

## Guidance

### Guidance structure

Diagram 20. The guidance structure of JPK\_V7M and JPK\_V7K.

By entering “1” the taxable person confirms that they have acquainted themselves with and accepted the following:

- this return serves as a basis to issue an enforcement title document according to statutory provisions governing administrative enforcement procedure in cases where the tax due is not paid when due or is underpaid;
- for providing untrue information or concealing the truth resulting in the possible tax underpayment the taxable person shall bear liability according to the Code of Fiscal Offences.

## Examples

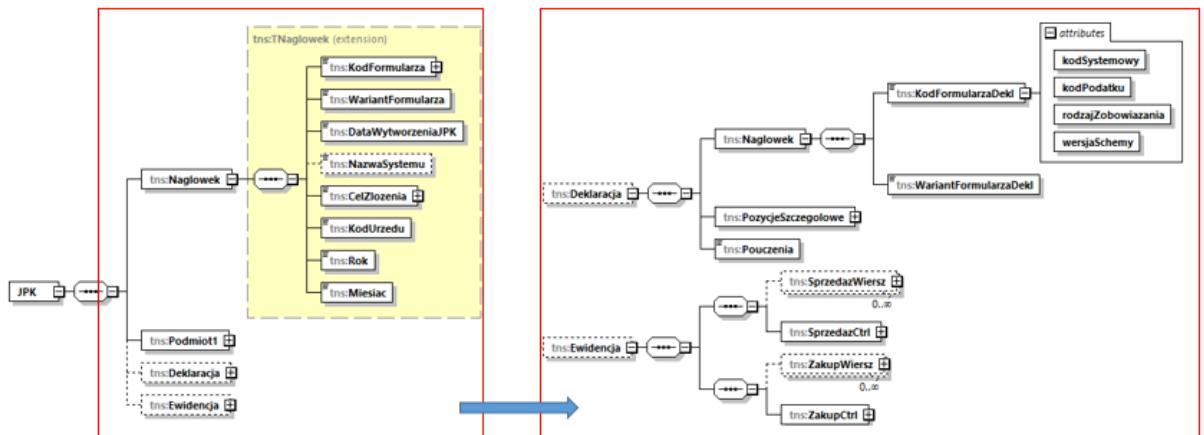

### 1. Filing the original JPK\_VAT

Diagram 23. Filing the original JPK\_V7K (records for the third month of a quarter and return for the entire quarter).

## 2. Amending the JPK\_VAT file

An amendment to the JPK\_VAT file (filing purpose “2”) may be made to:

1. the records part and the return part,
2. the records part, or
3. the return part.

### Example 4

#### ✓ Amendment to the records part of JPK\_V7M

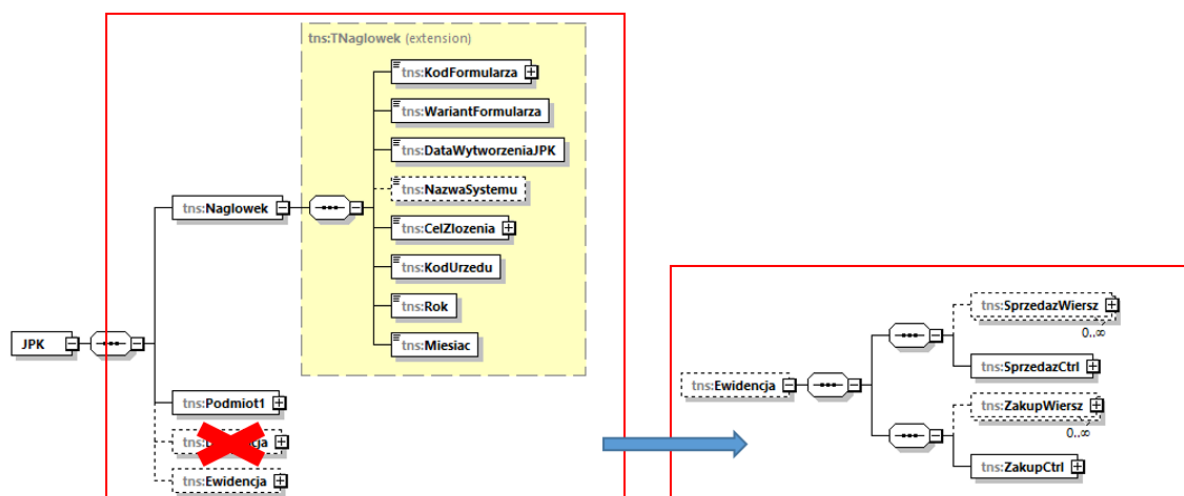

When amending the records part only, in the main diagram the taxable person fills in the following elements: **Naglowek**, **Podmiot1** and **Ewidencja**.

#### **IMPORTANT**

An **amendment to filed records** not altering the contents of the return part **shall not affect the settlement of tax.**

An amendment made only to the records part of the JPK\_VAT file, such as, for instance, change of the contractor's TIN, shall not affect, for instance, the deadline for the refund of the excess of input tax over output tax resulting from the tax calculation contained in the original file (the return part).

Diagram 24. Amendment to the records part of JPK\_V7M.

### Example 5

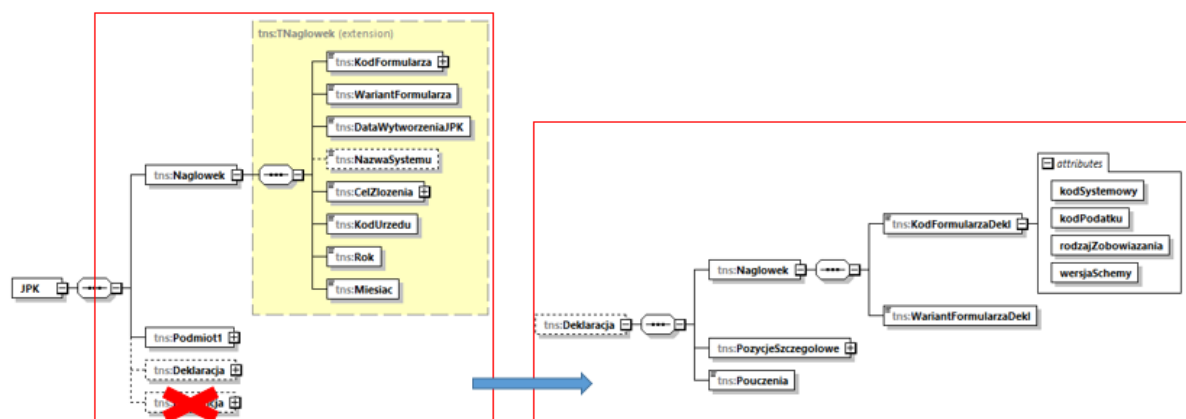

#### ✓ Amendment to the return part of JPK\_V7M

When amending the return part only, in the main diagram the taxable person fills in the following elements: **Naglowek**, **Podmiot1** and **Deklaracja**.

#### IMPORTANT

An amendment to the **return part** only – for instance the amount of tax excess from the previous return – shall not affect the contents of the records part.

Diagram 25. Amendment to the return part of JPK\_V7M.

## IMPORTANT

Depending on the filing period, the original JPK\_V7K differs from the original JPK\_V7M in terms of data that are contained in it. It can contain either the records part only or the records part and the return part.

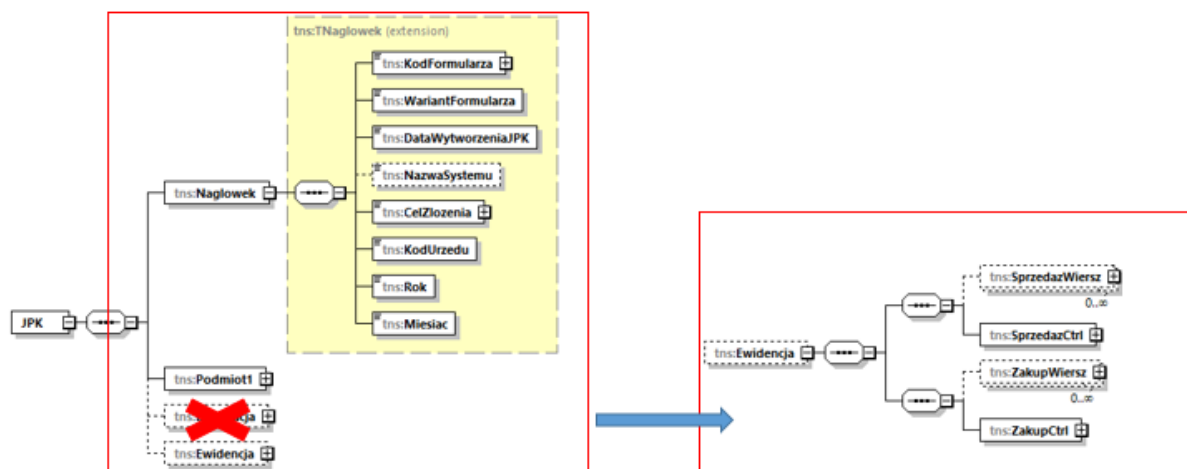

An amendment to the JPK\_V7K file resulting from a correction's being made to the records information pertaining to the first two months of a quarter shall be filed in the same way as the original JPK\_V7K is filed for these first two months of a quarter (see example 2).

## Example 6

- ✓ **Amendment to the records part of JPK\_V7K pertaining to the third month of a quarter**

When amending the records part only, in the main diagram the taxable person fills in the following elements: **Naglowek**, **Podmiot1** and **Ewidencja**.

Diagram 26. Amendment to the records part of JPK\_V7K pertaining to the third month of a quarter.

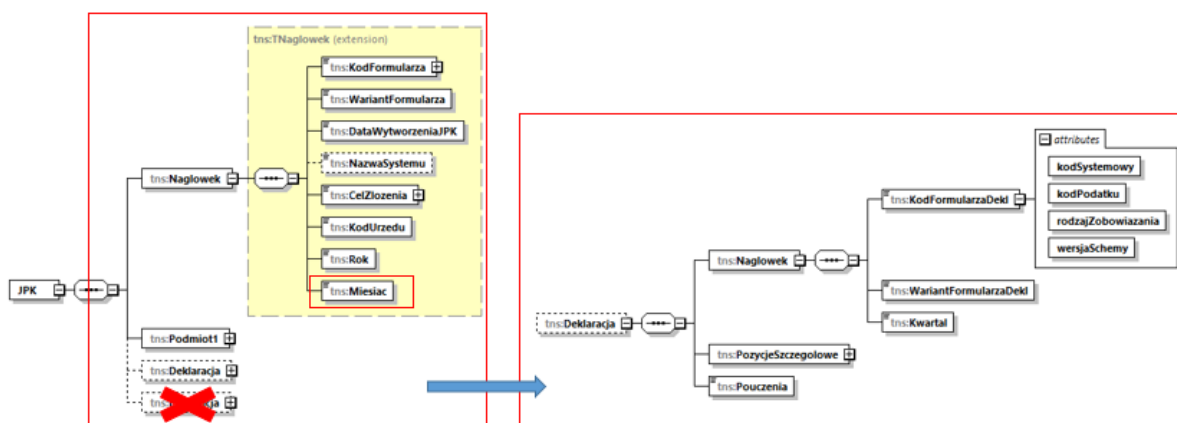

### Example 7

- ✓ Amendment to the quarterly return of JPK\_V7K (third month of a quarter)

When amending the return part only, in the main diagram the taxable person fills in the following elements: **Naglowek**, **Podmiot1** and **Deklaracja**.

Diagram 27. Amendment to the quarterly return of JPK\_V7K (third month of a quarter).

## NOTE

Given that the field **Miesiac** in the element **Naglowek** of the main diagram must be filled in, when amending the return part, the taxable person should provide the number of the last month of a quarter, **that is, 3, 6, 9 or 12, respectively.**

3. The records and return parts with no entries (the so-called “zero” records or “zero” return).

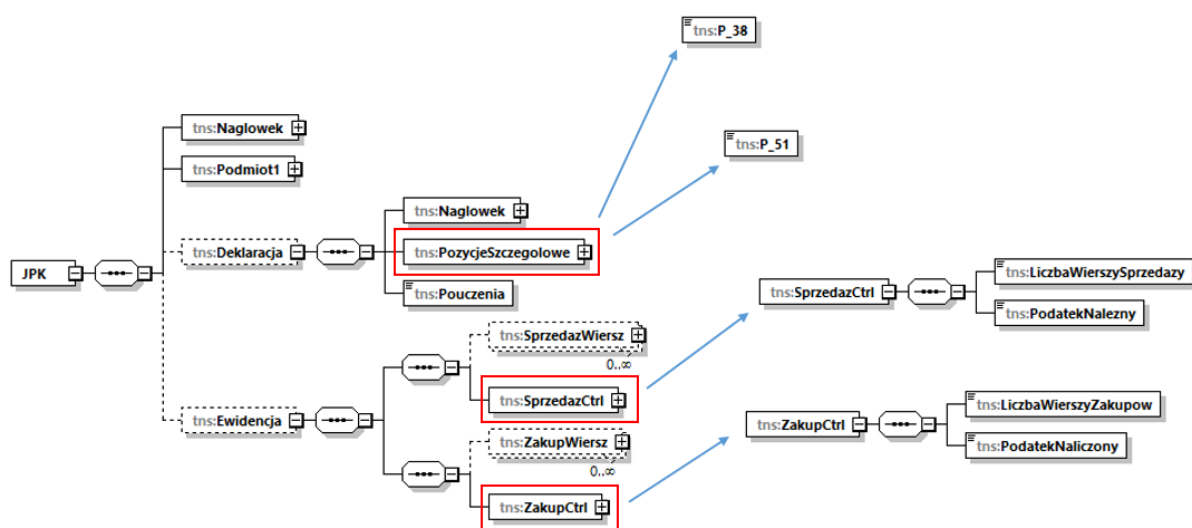

### Example 8

- ✓ The records and return parts without entries (the so-called “zero” records or “zero” return”) of JPK\_V7M and JPK\_V7K

If no transactions relevant in terms of value added tax are effected in a month/quarter concerned, the taxable person files the so-called “zero” JPK\_VAT, filled in as follows:

1. In fields P\_38 and P\_51 of **Deklaracja** the taxable person declares “0”.
2. In **LiczbaWierszySprzedazy** and **LiczbaWierszyZakupow** the taxable person declares “0”.
3. In **PodatekNalezny** and **PodatekNaliczony** the taxable person declares “0.00”.

Diagram 28. The return and records parts with no entries (“zero return/zero records”) of JPK\_V7M and JPK\_V7K.

**NOTE**

The principles according to which the new JPK\_VAT is filled in for the so-called “zero” return and “zero” records shall be applicable when filing an amendment resulting from a “zero” adjustment’s being made in the records part or return part.

#### 4. Amendment to the new JPK\_VAT according to Art. 89a of the Act

##### Example 9

##### ✓ Amendment according to Art. 89a sec. 1 of the Act (“in minus”)

For receivables whose uncollectable status has been reasonably determined, as referred to Art. 89a sec. 1 of the Act (the so-called “bad debt allowance”), a taxable person (creditor) amending the taxable base and output tax charged on the supply of goods and/or services in the territory of the country, should recognize the entire accounting document by entering “1” in **KorektaPodstawyOpodt** and declare individually the amended taxable base and output tax amounts with the sign “in minus”, broken down by individual tax rates.

Table. 20. Manner of settling the amendment referred to under Art. 89a sec. 1 of the Act in the output tax records of JPK\_V7M and JPK\_V7K.

Thereafter, the aggregate amended taxable base and output tax, as referred to under Art. 89a sec. 1 of the Act, provided under K\_15 through K\_20, should be entered in fields P\_68 and P\_69, respectively, of the return part, with the sign “in minus”.

##### Example 10

##### ✓ Amendment according to Art. 89a sec. 4 of the Act (“in plus”)

If a debt is settled or transferred in any way after a tax return containing the amendment referred to under Art. 89a sec. 1 is filed, the creditor shall increase the taxable base and output tax in the tax filing pertaining to the settlement period in which the debt is so settled or transferred according to Art. 89a sec. 4 of the Act. In the records, the taxable person should recognize the entire accounting document by entering “1” in **KorektaPodstawyOpodt** and declare individual

amended taxable base and output tax amounts with the sign “in plus”, broken down by individual tax rates.

5. Reflecting the supply of goods and services where the taxable base is the commission amount less tax according to Art. 119 Art. 120 of the Act in the output tax and input tax records of JPK\_V7M and JPK\_V7K.

#### Example 11

- ✓ Supply of tourism-related services where the taxable base is the commission amount less tax pursuant to Art. 119 of the Act – marked as MR\_T.

In cases where tax is calculated on the total of commissions obtained from individual tourism-related services, in the sales records the taxable person should enter the taxable base, that is, the commission less output tax, and the tax amount in fields intended for sales data, broken down by the respective tax rates, on the basis of an internal document (**WEW – Internal document**), with the procedure designation (**MR\_T – Supply of tourism-related services where the taxable base is the commission amount less tax pursuant to Art. 119 of the Act**). In the sales records the taxable person should enter also the actual sales documents with the procedure designation (**MR\_T**), together with the contractor’s data and date and number of the sale document, and should record the gross value in the field **SprzedazVAT\_Marza** related to the services for which the taxable base is the commission less tax according to Art. 119 of the Act.

Table 22. **Manner of settling the commission according to Art. 119 of the Act (as the total of all commissions) in the output tax records of JPK\_V7M and JPK\_V7K.**

In cases where tax is calculated on a single commission – on the basis of an actual sale document recorded with the contractor’s data and the procedure designation (**MR\_T – Supply of tourism-related services where the taxable base is the commission amount less tax pursuant to Art. 119 of the Act**) – in the sales records the taxable person should enter the taxable base, that is the commission less tax, and the tax amount in the fields intended for sales data, broken down by the respective tax rates.

The actual gross value should be entered in the field **SprzedazVAT\_Marza** related to the supply of goods where the taxable base is the commission less tax according to Art. 119 of the Act.

### **IMPORTANT**

In the case of services for which the taxable base is the commission less tax according to Art. 119 of the Act (marked as MR\_T) the negative value of the taxable base should not be declared in the return.

In the sales records (table below) the taxable person should enter documents evidencing the purchase of goods and services on the basis of which the commission is calculated, including the contractor’s data and number of the purchase document, and should record the gross value in the field **ZakupVAT\_Marza** pertaining to the acquisition of goods and services related to the sales for which the taxable base is the commission less tax according to Art. 119 of the Act.

## Example 12

- ✓ **Supply of second-hand goods, works of art, collector's items and antiques for which the taxable base is the commission less tax according to Art. 120 of the Act – marked as MR\_UZ.**

On the basis of the actual sales document recorded with the contractor's data and the procedure designation (**MR\_UZ – Supply of second-hand goods, works of art, collector's items and antiques where the taxable base is the commission less tax according to Art. 120 of the Act**), in the sales records the taxable person should enter the taxable base, that is, the commission less tax, and the tax amount in the fields intended for sales data, broken down by the respective tax rates.

The actual gross amount should be declared in the field **SprzedazVAT\_Marza** pertaining to the supply of goods for which the taxable base is the commission less tax due according to Art. 120 of the Act.

**Table 25. Manner of settling the commission according to Art. 120 sect. 4 of the Act in the output tax records of JPK\_V7M and JPK\_V7K.**

As regards collector's items, in cases where, subject to the consent of the tax office's head, the taxable person calculates the difference between the total value of supplies and the total value of acquisitions of the given type of collector's items in the settlement period concerned, entries should be made in the sales records in the same way as it is the case with MR\_T (where tax is calculated on the total of commissions generated on individual tourism-related services) on the basis of an internal evidence document and actual sales documents.

**Table 26. Manner of settling the commission according to Art. 120 sec. 5 of the Act in the output tax records of JPK\_V7M and JPK\_V7K.**
